

BUSINESS C715
Health Care Funding and Resource Allocation
Winter 2021 Course Outline
Health Policy and Management Area
DeGroote School of Business
McMaster University

COURSE OBJECTIVE

This course provides an overview of funding and resource allocation (financial, human and capital) across the key components of health care systems in Canada and selected other countries and recent proposals for reform. Students will learn how economic arrangements and policies affect the delivery of health promotion, prevention, and treatment services, including primary care, hospitals, community and long-term care and pharmaceutical policy. Students will have the opportunity to explore the application of theory to current issues facing healthcare decision-makers. Students will further develop their presentation and writing skills and their ability to receive and offer constructive peer critique. The course will help prepare students for management and policy roles in government, health regions, and health care organizations in Canada and other countries.

Avenue:	Yes	Leadership:	Yes	IT skills:	Yes	Global view:	Yes
Participation:	Yes	Ethics:	Yes	Numeracy:	Yes	Written skills:	Yes
Evidence-based:	Yes	Innovation:	Yes	Group work:	Yes	Oral skills:	Yes
Experiential:	Yes	Guest speaker(s):	Yes	Final Exam:	No		

COURSE DESCRIPTION

C715/ Health Care Funding and Resource Allocation

This course will examine the allocation of resources for health care and health promotion in Canada. Students will develop a clear understanding of the components of health systems in Canada, and how the financial, human and capital resources used are financed (where the money comes from), how resources are allocated across the system (funding) and the influence of health professional remuneration (payment) on services organization and delivery. Canadian approaches will be compared with those in selected other countries within a global context. Issues of financial sustainability and efficiency in health care systems will be examined along with proposals for system reform to improve quality and control cost increases in Canada and elsewhere. Topics will include hospital funding, physician payment, pharmaceutical pricing, alternate financing approaches, and the role of provincial and regional structures in allocating funding for long-term care, rehabilitation, and community health programs.

LEARNING OUTCOMES

Upon completion of this course, students will be able to complete the following key tasks:

- Identify the ways in which resources are allocated to each of the key components of health systems, ranging from health promotion/prevention through treatment and aftercare services;
- Demonstrate an understanding of the role of governance, funding and financing arrangements on how resources are allocated across components of Canadian health systems with implications for efficiency and equity;
- Conduct comparative analysis of health system governance, funding and financing arrangements across jurisdictions;
- Identify key current reform (proposals or underway) of health care funding and resource allocation across Canada and in selected other countries;
- Assess proposed reforms (proposals or underway) for their feasibility in the Canadian context at the national, provincial/territorial and health region levels to understand barriers and opportunities to implementation;
- Gain skills in small group work, peer review and different presentation modalities.

EVALUATION

Learning in this course comes from lectures on selected concepts, from related readings, in-class small group work including discussions and presentations and participation and from researching your assignments, and presentations. All work will be evaluated on an individual basis except where group work is expected. In these cases group members will share the same grade, unless all group members agree to an adjustment.

Your final grade will be calculated as follows:

Components and Weights

Weekly Online Discussions	Class participation (5 weeks of online dialogues – 3 Groups)	15%
Assignment #1 (individual)	Media Analysis Summary (3-4 pages)	15%
Assignment #2 (group of 3-4)	International Comparative Analysis (PowerPoint Presentation)	25%
Assignment #3 (individual)	Issue Solution - Mini Paper (8-10 pages)	45%
Total		100%

Grade Conversion

At the end of the course your overall percentage grade will be converted to your letter grade in accordance with the following conversion scheme.

Grade (Points)	* Percentages
A+ (12)	90-100
A (11)	85-89
A- (10)	80-84
B+ (9)	75-79
B (8)	70-74
B- (7)	60-69
F (0)	00-59

Communication and Feedback

Students that are uncomfortable in directly approaching an instructor regarding a course concern may send a confidential and anonymous email to the respective Area Chair or Associate Dean:

<http://www.degroote.mcmaster.ca/curr/emailchairs.aspx>

Students who wish to correspond with instructors or TAs directly via email must send messages that originate from their official McMaster University email account. This protects the confidentiality and sensitivity of information as well as confirms the identity of the student. Emails regarding course issues should NOT be sent to the Administrative Assistant.

Instructors are encouraged to conduct an informal course review with students by Week #4 to allow time for modifications in curriculum delivery. Instructors should provide evaluation feedback for at least 10% of the final grade to students prior to Week #8 in the term.

Response time to student communication

Students can expect to receive a response to emailed communication within two business days of sending their message for messages sent before 3pm. This means that if an assignment is due by class time on Wednesday, enquiries from students should be sent before 3pm on Friday-this means it's important to do a bit of planning ahead.

ASSIGNMENTS

Assignment #1 – Individual Media Issue Analysis – 15%

Students will be responsible for building a maximum of 4 page summary on an issue in Health Care Funding and Resource Allocation that you have identified at the federal, provincial, LHIN, or health care organization level that pertains to one of the three main theme areas: Who Pays, Who Gets, and Who Gets Paid? and is covered in the **MEDIA** over the past two years. (see table below for an overview of topics). The aim is to get the student to identify an issue of importance and summarize its perceived impact. It is not about offering a solution. Paper to be double-spaced and APA referencing required. This assignment is worth 15% of your mark and is due on **Sunday, January 31st at 11:59 p.m.**

For an example of a policy brief: http://www.jhsph.edu/research/centers-and-institutes/womens-and-childrens-health-policy-center/de/policy_brief/index.html

	Who Pays?	Who Gets?	Who Gets Paid?
Individual vs. insurer vs. government	<ul style="list-style-type: none"> • Health system arrangement • Public or private? • Taxation or SHI? • Services: <ul style="list-style-type: none"> ○ Pharmaceuticals ○ Mental health ○ Hospital-based services ○ General practitioners ○ Specialist physicians/services 	<ul style="list-style-type: none"> • Beneficiaries of the health system – who is in or out? <ul style="list-style-type: none"> ○ Federal ○ Provincial/territorial • Vulnerable populations • Private vs. publicly covered services • Insurance arrangements 	<ul style="list-style-type: none"> • Remuneration of healthcare systems <ul style="list-style-type: none"> ○ Activity-based funding, QBP, HBAM, Bundled care • Remuneration of healthcare professionals <ul style="list-style-type: none"> ○ Capitation ○ FFS ○ Salary • Incentivization of the healthcare workforce through HTA and VBID

Assignment #2 – International Comparative Presentation – 25%

Working in groups of three-four (depending on class size), students will select one topic in the domain of health care funding, financing or payment and compare the approach adopted in a Canadian jurisdiction with that used in another jurisdiction within Canada or another country to determine if the Canadian jurisdiction could benefit from the other jurisdiction’s approach. Think about which area your topic fits into: Who Pays, Who Gets, Who Gets Paid- and from which perspective you are thinking about efficiency, equity and health system performance (from the

payer, provider or population perspective). Topics are open and duplications are allowed. The aim of the assignment is to build from assignment one (identification) to comparison.

Groups will prepare a presentation as if they were facilitating a class discussion that includes the following:

- A summary of the topic in the area of health care funding and resource allocation and its importance;
- Identification of the funding and resource allocation issue(s) in this topic area in the selected Canadian jurisdiction;
- A statement of what the comparator jurisdiction is and why it was selected for the analysis;
- An application of the concepts taught to date in class as appropriate to your analysis;
- A comparison of the approaches to funding and resource allocation in this topic area in the two jurisdictions (**equity, efficiency, resource allocation frameworks**);
- An analysis of whether or not the approach used in the comparator jurisdiction would be beneficial in the selected Canadian jurisdiction;
- Conclusions and recommendations.
- Generative Questions**
- Appendix: APA References

**Each group will conclude their presentation with at least two generative questions that would engage the class as if we were online together in the classroom.

This assignment is worth 25% of your mark and is due on **Sunday, March 7th at 11:59 p.m.**

Note that members of each group will receive the same mark.

Assignment #3 – Individual Mini Paper – Issue Solution – 45%

The final course assignment consists of each student selecting a proposal for reform to any element of health care funding and resource allocation in a jurisdiction in Canada or elsewhere, analysing the proposed reform using course concepts and presenting it in the form of a 8-10 page paper.

The goal here is that we build from assignment 1 (issue identification) and assignment 2 (comparison) to assignment 3 (possible solutions)

The paper should conform to the following:

- submitted online (A2L Dropbox) in Microsoft Word format.
- 1-inch margins and 11-point font;
- Double-spaced; and,
- APA Reference Format.

The final briefing note is to be submitted by **Saturday, April 10, at 11:59 p.m.**

Class Participation – Weekly Online Discussions – 15%

15% of the grade will be for class participation. Students may not move between online group sections without the explicit approval of the instructor. Participation will **NOT** be graded by simply counting each contribution a student makes. Students are expected to share ideas and experiences related to the topics presented during onsite and online discussions. Students are expected to post at least one main response to the weekly question(s) and to participate in the overall discussion by commenting on other students' responses (at least **1** times per week; i.e. a total of at least **2** posts per week). Postings should be reflective, concise and respectful. Make sure you are adding value and not simply repeating what others have already said (refer to the Online Discussion Grading Scale posted in the content section of the Avenue site).

The course instructor(s) and teaching assistant(s) will limit their participation so as not to overly influence the direction of the discussion. To further facilitate discussion, students in each course section may be further divided into groups. If groups are formed, information about which group students have been assigned to will be posted on the A2L site.

There is also a general discussion area on the A2L site where students may interact with each other (instructors and teaching assistants will not be monitoring this area routinely so if you have an important question please phone or email directly).

ACADEMIC DISHONESTY

It is the student's responsibility to understand what constitutes academic dishonesty. Please refer to the University Senate Academic Integrity Policy at the following URL:

<http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicIntegrity.pdf>

This policy describes the responsibilities, procedures, and guidelines for students and faculty should a case of academic dishonesty arise. Academic dishonesty is defined as to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. Please refer to the policy for a list of examples. The policy also provides faculty with procedures to follow in cases of academic dishonesty as well as general guidelines for penalties. For further information related to the policy, please refer to the Office of Academic Integrity at:

<http://www.mcmaster.ca/academicintegrity>

MISSED ACADEMIC WORK

Missed Mid-Term Examinations / Tests / Class Participation

Where students miss a regularly scheduled mid-term or class participation for legitimate reasons as determined by the MBA Academic Services Office, the weight for that test/participation will be distributed across other evaluative components of the course at the discretion of the instructor. Documentation explaining such an absence must be provided to the MBA Academic Services Office within five (5) working days upon returning to school.

To document absences for health related reasons, please provide the Petition for Relief for MBA Missed Term Work and the McMaster University Student Health Certificate which can be found on the DeGroot website at <http://mbastudent.degroot.mcmaster.ca/forms-and-applications/>. Please do not use the online McMaster Student Absence Form as this is for Undergraduate students only. University policy states that a student may submit a maximum of three (3) medical certificates per year after which the student must meet with the Director of the program.

To document absences for reasons other than health related, please provide the Petition for Relief for MBA Missed Term Work and documentation supporting the reason for the absence.

Students unable to write a mid-term at the posted exam time due to the following reasons: religious; work-related (for part-time students only); representing university at an academic or varsity athletic event; conflicts between two overlapping scheduled mid-term exams; or other extenuating circumstances, have the option of applying for special exam arrangements. Such requests must be made to the MBA Academic Services Office at least ten (10) working days before the scheduled exam along with acceptable documentation. Instructors cannot themselves allow students to unofficially write make-up exams/tests. Adjudication of the request must be handled by the MBA Academic Services Office.

If a mid-term exam is missed without a valid reason, students will receive a grade of zero (0) for that component.

Missed Final Examinations

A student who misses a final examination without good reason will receive a mark of 0 on the examination.

All applications for deferred and special examination arrangements must be made to the MBA Academic Services Office. Failure to meet the stated deadlines may result in the denial of these arrangements. Deferred examination privileges, if granted, must be satisfied during the examination period at the end of the following term. There will be one common sitting for all deferred exams.

Failure to write an approved deferred examination at the pre-scheduled time will result in a failure

for that examination, except in the case of exceptional circumstances where documentation has been provided and approved. Upon approval, no credit will be given for the course, and the notation N.C. (no credit) will be placed on the student's transcript. Students receiving no credit for a required course must repeat the course. Optional or elective courses for which no credit is given may be repeated or replaced with another course of equal credit value.

Requests for a second deferral or rescheduling of a deferred examination will not be considered.

Any student who is unable to write a final examination because of illness is required to submit the Application for Deferred MBA Final Examination and a statement from a doctor certifying illness on the date of the examination. The Application for Deferred MBA Final Examination and the McMaster University Student Health Certificate can be found on the DeGroot website at <http://mbastudent.degroot.mcmaster.ca/forms-and-applications/>. Please do not use the online McMaster Student Absence Form as this is for Undergraduate students only. Students who write examinations while ill will not be given special consideration after the fact.

In such cases, the request for a deferred examination privilege must be made in writing to the MBA Academic Services Office within five business days of the missed examination.

Special examination arrangements may be made for students unable to write at the posted exam time due to compelling reasons (for example religious, or for part-time students only, work-related reasons):

- Students who have religious obligations which make it impossible to write examinations at the times posted are required to produce a letter from their religious leader stating that they are unable to be present owing to a religious obligation.
- Part-time students who have business commitments which make it impossible to write examinations at the times posted are required to produce a letter on company letterhead from the student's immediate supervisor stating that they are unable to be present owing to a specific job commitment.

In such cases, applications must be made in writing to the MBA Academic Services Office at least ten business days before the scheduled examination date and acceptable documentation must be supplied.

If a student is representing the University at an academic or athletic event and is available at an overlapping scheduled time of the test/examination, the student may write the test/examination at an approved location with an approved invigilator, as determined by the MBA Academic Services Office.

In such cases, the request for a deferred examination privilege must be made in writing to the MBA Academic Services Office within ten business days of the end of the examination period.

Note: A fee of \$50 will be charged for a deferred exam written on campus and a fee of \$100 for deferred exams written elsewhere. In cases where the student's standing is in doubt, the Graduate

Admissions and Study Committee may require that the student with one or more deferred examination privileges refrain from re-registering until the examination(s) have been cleared.

STUDENT ACCESSIBILITY SERVICES

Student Accessibility Services (SAS) offers various support services for students with disabilities. Students are required to inform SAS of accommodation needs for course work at the outset of term. Students must forward a copy of such SAS accommodation to the instructor normally, within the first three (3) weeks of classes by setting up an appointment with the instructor. If a student with a disability chooses NOT to take advantage of an SAS accommodation and chooses to sit for a regular exam, a petition for relief may not be filed after the examination is complete. The SAS website is:

<http://sas.mcmaster.ca>

POTENTIAL MODIFICATIONS TO THE COURSE

The instructor and university reserve the right to modify elements of the course during the term. The university may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes. It is the responsibility of the student to check their McMaster email and course websites weekly during the term and to note any changes.

RESEARCH USING HUMAN SUBJECTS

ONLY IF APPLICABLE

Research involving human participants is premised on a fundamental moral commitment to advancing human welfare, knowledge and understanding. As a research intensive institution, McMaster University shares this commitment in its promotion of responsible research. The fundamental imperative of research involving human participation is respect for human dignity and well-being. To this end, the University endorses the ethical principles cited in the Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans:

<http://www.pre.ethics.gc.ca>

McMaster University has mandated its Research Ethics Boards to ensure that all research investigations involving human participants are in compliance with the Tri-Council Policy Statement. The University is committed, through its Research Ethics Boards, to assisting the research community in identifying and addressing ethical issues inherent in research, recognizing that all members of the University share a commitment to maintaining the highest possible standards in research involving humans.

If you are conducting original research, it is vital that you behave in an ethical manner. For example, everyone you speak to must be made aware of your reasons for eliciting their responses and consent to providing information. Furthermore, you must ensure everyone understands that participation is entirely voluntary. Please refer to the following website for more information about McMaster University’s research ethics guidelines:

<http://www.mcmaster.ca/ors/ethics>

Organizations that you are working with are likely to prefer that some information be treated as confidential. Ensure that you clarify the status of all information that you receive from your client. You **MUST** respect this request and cannot present this information in class or communicate it in any form, nor can you discuss it outside your group. Furthermore, you must continue to respect this confidentiality even after the course is over.
